

Context::FlushOutput

Context::WriteOutput

TVideoIOYuvMem::write

```
graph LR; A[Context::FlushOutput] --> C[TVideoIOYuvMem::write]; B[Context::WriteOutput] --> C;
```

The diagram illustrates a mapping from two context methods to a single target. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'Context::FlushOutput' and the bottom box contains 'Context::WriteOutput'. On the right, there is a single gray rectangular box with a black border containing the text 'TVideoIOYuvMem::write'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'Context::FlushOutput' and 'Context::WriteOutput' are mapped to the 'TVideoIOYuvMem::write' function.
