

cxxopts::OptionValue::as

```
graph LR; A["cxxopts::OptionValue::as"] --> B["cxxopts::values::abstract_value::get"]
```

A diagram showing a call to the `as` method of `OptionValue` from the `cxxopts` namespace. A blue arrow points from the `as` method to the `abstract_value::get` method of the `values` namespace.

cxxopts::values::abstract
