lctm::Decoder::set_idr

```
graph LR; A[DecoderApp::push_base_enhancement] --> C[lctm::Decoder::set_idr]; B[DecoderApp::push_base_enhancement] --> C;
```

The diagram illustrates a call sequence. On the left, two identical boxes represent the function `DecoderApp::push_base_enhancement`. Blue arrows from the right side of each box point to a single box on the right, which represents the function `lctm::Decoder::set_idr`. The target box has a gray background, while the source boxes have a white background.
