

Ictm::FileEncoderImpl
::encode_file

Ictm::FileEncoderImpl
::encode_file_with_base

Ictm::FileEncoderImpl
::encode_file_with_decoder

Ictm::FileEncoderImpl
::encode

```
graph LR; A[Ictm::FileEncoderImpl::encode_file] --> D[Ictm::FileEncoderImpl::encode]; B[Ictm::FileEncoderImpl::encode_file_with_base] --> D; C[Ictm::FileEncoderImpl::encode_file_with_decoder] --> D;
```

The diagram illustrates the relationship between three private methods and one public method in the Ictm::FileEncoderImpl class. Three boxes on the left, each containing a private method name, have blue arrows pointing to a single box on the right containing a public method name. The boxes on the left are white with black text, while the box on the right is gray with black text.
