graph LR; A[lctm::FileEncoderImpl::encode_file_with_base] --> D[lctm::ImageDescription::colourspace]; B[lctm::FileEncoderImpl::encode_file_with_decoder] --> D; C[DecoderApp::push_base_enhancement] --> D;
```

The diagram illustrates a dependency or data flow. On the left, there are three rectangular boxes, each containing a text label. Blue arrows originate from the right side of each of these three boxes and point towards a single, larger rectangular box on the right. The target box on the right has a gray background and contains a text label. The arrows indicate that the three boxes on the left are inputs or sources for the box on the right.
