Ictm::YUVReader::update_data

```
graph LR; A[DecoderApp::push_base_enhancement] --> C[Ictm::YUVReader::update_data]; B[DecoderApp::push_base_enhancement] --> C;
```

The diagram illustrates two separate calls to the function `DecoderApp::push_base_enhancement`, each represented by a white rectangular box with a black border. Both boxes have blue arrows pointing towards a single, gray rectangular box on the right labeled `Ictm::YUVReader::update_data`. This suggests that the `update_data` function is invoked multiple times from the `push_base_enhancement` function.
