Ictm::YUVWriter::update_data

```
graph LR; A[DecoderApp::push_base_enhancement] --> C[Ictm::YUVWriter::update_data]; B[DecoderApp::push_base_enhancement] --> C;
```

The diagram illustrates two separate calls to the function `DecoderApp::push_base_enhancement`, each represented by a white rectangular box. Both boxes have a blue arrow pointing to a single, shaded gray rectangular box on the right, which represents the function `Ictm::YUVWriter::update_data`. This visualizes that both calls result in the same target function being executed.
