

`lctm::RegisteredSEI
::extract_enhancement_sei`

`lctm::UnregisteredSEI
::extract_enhancement_sei`

`lctm::rbsp_decoder
::copy_sei`

```
graph LR; A["lctm::RegisteredSEI::extract_enhancement_sei"] --> C["lctm::rbsp_decoder::copy_sei"]; B["lctm::UnregisteredSEI::extract_enhancement_sei"] --> C;
```

The diagram illustrates a call graph where two different SEI (Supplemental Enhancement Information) extraction functions, one for registered SEI and one for unregistered SEI, both call the same `copy_sei` function within the `rbsp_decoder` class. The source functions are shown in white boxes, and the target function is shown in a gray box. Blue arrows indicate the direction of the calls.
