The diagram illustrates a dependency or call relationship. Three source functions, each in a white box with a black border, are on the left. Blue arrows point from each of these source functions to a single target function, 'vtm::APS::getAPSType', which is in a grey box on the right. The source functions are 'vtm::ParameterSetMap::checkAuApsContent', 'vtm::HLSyntaxReader::parseAPS', and 'vtm::ParameterSetManager::storeAPS'.
