

vtm::CodingStructure
::isDecomp

```
graph LR; A[vtm::CodingStructure::isDecomp] --> B[vtm::CodingStructure::isDecomp]; B --> B;
```

The diagram illustrates a call to the `vtm::CodingStructure::isDecomp` function. It consists of two rectangular boxes. The left box is white with a black border and contains the text `vtm::CodingStructure::isDecomp`. A straight blue arrow points from the right side of this box to the left side of a second box. The second box is gray with a black border and also contains the text `vtm::CodingStructure::isDecomp`. A curved blue arrow originates from the top of the gray box and points back to its top, representing a self-call or a recursive operation.
