

vtm::TrQuant::transformNxN

vtm::TrQuant::transformNxN

vtm::CodingStructure
::useSubStructure

vtm::CodingStructure
::getResiBuf

```
graph LR; A[vtm::TrQuant::transformNxN] --> D[vtm::CodingStructure::getResiBuf]; B[vtm::TrQuant::transformNxN] --> D; C[vtm::CodingStructure::useSubStructure] --> D;
```

The diagram illustrates three separate function calls on the left, each represented by a white rectangular box with a black border. These boxes are arranged vertically. Three blue arrows originate from the right side of each of these boxes and point towards a single, larger gray rectangular box on the right. This gray box contains the text 'vtm::CodingStructure::getResiBuf', indicating that all three functions on the left are calling this specific method.
