

vtm::CABACReader::getCtx

vtm::CABACReader::getCtx

vtm::Ctx::getCtx

```
graph LR; A[vtm::CABACReader::getCtx] --> C[vtm::Ctx::getCtx]; B[vtm::CABACReader::getCtx] --> C;
```

The diagram illustrates a function call resolution. On the left, two identical boxes labeled 'vtm::CABACReader::getCtx' are stacked vertically. Two blue arrows originate from the right side of these boxes and point towards a single box on the right labeled 'vtm::Ctx::getCtx'. The target box is shaded gray, while the source boxes are white with black borders.
