

vtm::HLSyntaxReader
::parseSPS

vtm::HLSyntaxReader
::parseVPS

vtm::HLSyntaxReader
::parseOlsHrdParameters

```
graph LR; A[vtm::HLSyntaxReader::parseSPS] --> C[vtm::HLSyntaxReader::parseOlsHrdParameters]; B[vtm::HLSyntaxReader::parseVPS] --> C;
```

The diagram illustrates a flow where two separate parsing functions, `vtm::HLSyntaxReader::parseSPS` and `vtm::HLSyntaxReader::parseVPS`, both lead to a common function, `vtm::HLSyntaxReader::parseOlsHrdParameters`. The boxes for the source functions are white, while the target box is shaded gray, indicating a final or common destination.
