

vtm::PicHeader::initPicHeader

vtm::PicHeader::PicHeader

vtm::ReferencePictureList
::setNumberOfActivePictures

```
graph LR; A[vtm::PicHeader::initPicHeader] --> C[vtm::ReferencePictureList::setNumberOfActivePictures]; B[vtm::PicHeader::PicHeader] --> C;
```

The diagram illustrates two calls to the method `vtm::ReferencePictureList::setNumberOfActivePictures`. On the left, two boxes represent the calling methods: `vtm::PicHeader::initPicHeader` (top) and `vtm::PicHeader::PicHeader` (bottom). Blue arrows point from each of these boxes to a single box on the right, which represents the target method `vtm::ReferencePictureList::setNumberOfActivePictures`. The target box is shaded gray, while the caller boxes are white with black borders.
