

vtm::TU::isNonTransformed
ResidualRotated

vtm::SPSRExt::settingsDiffer
FromDefaults

vtm::SPSRExt::getTransform
SkipRotationEnabledFlag

```
graph LR; A[vtm::TU::isNonTransformedResidualRotated] --> C[vtm::SPSRExt::getTransformSkipRotationEnabledFlag]; B[vtm::SPSRExt::settingsDifferFromDefaults] --> C;
```

The diagram illustrates a logical relationship where two conditions on the left lead to a single outcome on the right. The first condition, 'vtm::TU::isNonTransformedResidualRotated', and the second condition, 'vtm::SPSRExt::settingsDifferFromDefaults', both have blue arrows pointing to the box 'vtm::SPSRExt::getTransformSkipRotationEnabledFlag'.
