The diagram illustrates two function calls from different contexts pointing to a single target. On the left, two white rectangular boxes with black borders contain the function names. The top box is 'vtm::AdaptiveLoopFilter::ALFProcess' and the bottom box is 'vtm::HLSyntaxReader::parseSliceHeader'. On the right, a gray rectangular box with a black border contains the target 'vtm::Slice::getTileGroup' followed by 'AlfEnabledFlag' on a new line. Two blue arrows originate from the right side of the left boxes and point to the left side of the gray box.
