

vtm::Slice::setDefaultClpRng

```
graph LR; A[vtm::Slice::setDefaultClpRng] --> B[vtm::SPS::getBitDepth]
```

A diagram showing a call from the function `vtm::Slice::setDefaultClpRng` to the function `vtm::SPS::getBitDepth`. The first function is in a grey box, and the second is in a white box. A blue arrow points from the first box to the second.

vtm::SPS::getBitDepth
