

vtm::PelStorage::create

vtm::InterPrediction
::init

vtm::static_vector
::empty

```
graph LR; A[vtm::PelStorage::create] --> C[vtm::static_vector::empty]; B[vtm::InterPrediction::init] --> C;
```

The diagram illustrates a dependency or call relationship. Two white rectangular boxes on the left, representing functions, have blue arrows pointing to a single gray rectangular box on the right. The top box is labeled 'vtm::PelStorage::create' and the bottom box is labeled 'vtm::InterPrediction::init'. Both arrows point to a gray box labeled 'vtm::static_vector::empty', indicating that both functions interact with or depend on this static vector.
