```
graph LR; A[cxxopts::KeyValue::as] --> D[cxxopts::values::parse_value]; B[cxxopts::values::abstract_value::parse] --> D; C[cxxopts::values::abstract_value::parse] --> D; E[cxxopts::values::parse_value] --> D;
```

The diagram illustrates a mapping or inheritance relationship. On the left, there are four white rectangular boxes with black borders, each containing a C++-style identifier. On the right, there is a single gray rectangular box with a black border, also containing a C++-style identifier. Four blue arrows originate from the right side of each box on the left and point towards the left side of the gray box on the right. The arrows from the top two boxes are longer and more diagonal, while the arrows from the bottom two boxes are shorter and more horizontal.
