

Ictm::CodecCreate

Ictm::CreateYUVReader

Ictm::file_size

```
graph LR; A[Ictm::CodecCreate] --> C[Ictm::file_size]; B[Ictm::CreateYUVReader] --> C;
```

The diagram illustrates a dependency or data flow. Two white rectangular boxes on the left, labeled 'Ictm::CodecCreate' and 'Ictm::CreateYUVReader', have blue arrows pointing to a gray rectangular box on the right labeled 'Ictm::file_size'. This suggests that both functions interact with or depend on the 'file_size' variable.
