

vtm::CU::isISPLast

```
graph LR; A[vtm::CU::isISPLast] --> B[vtm::CU::getISPType]; B --> C[vtm::CU::divideTuInRows];
```

The diagram illustrates a sequence of three VTM CU functions. The first function, 'vtm::CU::isISPLast', is highlighted with a grey background. A blue arrow points from it to the second function, 'vtm::CU::getISPType', which has a white background. Another blue arrow points from the second function to the third function, 'vtm::CU::divideTuInRows', which also has a white background. All three functions are enclosed in rectangular boxes with black borders.

vtm::CU::getISPType
