

vtm::TU::isTSAllowed

```
graph LR; A[vtm::TU::isTSAllowed] --> B[vtm::SPS::getLog2MaxTransformSkipBlockSize]; A --> C[vtm::SPS::getTransformSkipEnabledFlag];
```

The diagram illustrates a dependency where the function `vtm::TU::isTSAllowed` (represented in a grey box) calls two other functions: `vtm::SPS::getLog2MaxTransformSkipBlockSize` and `vtm::SPS::getTransformSkipEnabledFlag` (both in white boxes). Blue arrows point from the grey box to each of the white boxes.

vtm::SPS::getLog2MaxTransform
